HOW IT WORKS

SLAYER PLUS uses stabilized chlorine dioxide to permanently eliminate odors at their source, breaking down smelly compounds rather than masking them. It also eliminates the stains left by urine, feces and other organic stains like coffee, tea, wine and more.

✓ Fast Acting

✓ Broad-Spectrum
Odor & Stain
Eliminator

✓ Safe for Most
Carpets, Fabrics
& Surfaces*

✓ No Residue

✓ Environmentally
Friendly

*When used as directed. Always pretest for colorfastness on carpet, rugs or any textile.

DIRECTIONS FOR APPLICATION:

Locate all areas which are sources of odor and stained areas. Remove as odor producing source material as possible through effective pre-cleaning. For best results, SLAYER PLUS should come in contact with the source of the odor to work most effectively.

PRE-TEST FIRST: Since SLAYER PLUS contains an oxidizing agent, pre-test all application surfaces (carpet, rugs, upholstery textiles, and hard surfaces) for colorfastness before use.

SAFE & VERSATILE: Use on any water safe surface (always pretest for colorfastness on carpet, rugs, or any textile) including carpet, draperies, upholstery, hard surfaces and floors, pet beds, mattresses, and more.

FRESHENS SPACES: Does a fabulous job of treating general odors in carpeting to help freshen up the whole room—without using an overwhelming perfume or fragrance.

SLAYER PLUS ALSO DOES NOT CONTAIN:

- ✗ Hydrogen peroxide, so you do not need to worry about white fingertips from application.
- ✗ Slow acting enzymes or bacterial culture technology which require a minimum of 60 minutes or more of dwell time to work effectively.
- ✗ Sodium Chlorite Treatments – these types of products can be deactivated when used in conjunction with acid rinses, spotters, or treatments.

EASY TO USE – POWERFUL RESULTS

1

For most direct treatment applications on odors and stains, apply SLAYER PLUS straight to the affected area.

2

For larger contaminated areas (entire rooms), mix one part SLAYER PLUS with four parts water and apply to affected area.

3

For urine contamination, you can inject or saturate mixed SLAYER PLUS directly into the carpet, backing, and cushion.

4

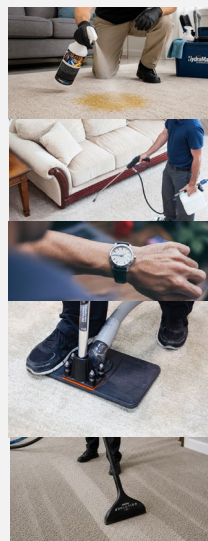

Allow to dwell for 3-5 minutes. Extract area thoroughly, preferably with sub-surface extraction tool.

5

If discoloration or stain remains after application, apply SLAYER PLUS directly to the stain and allow to dry naturally.

SAFER FOR
HOME, PETS
& FAMILY

ELIMINATES
ODORS AT
THE SOURCE

- ✓ BREAKS DOWN ODOR MOLECULES
- ✓ ELIMINATES STAINS
- ✓ DECONTAMINATES
- ✓ SAFE* & EFFECTIVE
- ✓ FAST ACTING

USE WITH A SUB-SURFACE
EXTRACTION OR SPOTTING
TOOL TO SPEED UP YOUR
EFFECTIVENESS AT TREATING
SEVERE URINE CONTAMINATION.

Pet Urine Odor and Stain Treatment Comparison Chart

Type of Treatment	Eliminates Odors	Removes Stains	Treats Potentially Harmful Contamination	Contains/Prevents Potential Structural Damage	Time to Work	Neutralized by Acid Rinses, Spotters, Treatments	Skin Sensitizer
Urine PreTreatment	✓	✓	✓	✓	Within minutes	No	No
Enzyme/Bacterial Cultures	✓	✓	⊗	⊗	1 hour - 24 hours	Possibly	Yes
"Cide" Type Deodorizers	✓	⊗	⊗	⊗	Within minutes	No	No
Hydrogen Peroxide Based Products	✓	✓	✓	✓	Within minutes	No	Yes
Sodium Chlorite Products	✓	✓	⊗	✓	Within minutes	Yes	No
SLAYER PLUS	✓	✓	✓	✓	Within minutes	No	No

Key:

✓ = Works effectively within time frame

✓ = Some effectiveness

⊗ = Generally not effective
